DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 25, 2007 has been entered.

Response to Amendment

2. Amendments to claims 33 and 35 have been entered in the above-identified application. Claims 1-32, 37, and 42-48 are cancelled. **Claims 33-36 and 38-41 are pending.**

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 33-36 and 38-41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably

Art Unit: 1773

convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claim 33 now recites that the plasma-polymerized film has a thickness which is about 10 to about 150 nm and which is not fused with the material of the first layer. The limitation that the plasma-polymerized film **"is not fused with the material of the first layer"** is newly added and recites a negative limitation.

Any negative limitation or exclusionary proviso must have basis in the original disclosure. The mere absence of a positive recitation is not basis for an exclusion. The Examiner was unable to find any support for such a negative limitation. Furthermore, the Applicants have failed to point to any specific support for such a limitation. Claims 34-36 and 38-41 are dependent on independent claim 33 and hence contain the newly added negative limitation.

Applicants must cancel the new matter in response to this Office Action and are reminded that any previously applied prior art rejection may be reinstated upon cancellation of the new matter.

Response to Arguments

4. Applicant's arguments with respect to claims 33-36 and 38-41 have been considered but are moot in view of the new ground(s) of rejection.
